**To whom it may concern**

Mr. Hamed Asadi has been my student at M.Sc. level at the Isfahan University of Technology and I assisted him in completing his M.Sc. dissertation as his second supervisor. I am pleased to be able to write this letter of recommendation for him.

For his M.Sc. dissertation Hamed assessed the ecotourism attractions of Abbas-Abad Wildlife Refuge using a hybrid Ordered Weighted Averaging (OWA) and DEMATEL based Analytic Network Process (DANP) method. His performance for doing his M.Sc. research was very good and he managed to publish one international journal paper from this work in Geojournal.

Hamed was personally an honest and dependable student with good communication skills and had excellent interpersonal relationship with his professors. In general, his academic performance and behaviour was satisfactory and I have a high opinion on his abilities to work in an academic atmosphere.

Please contact me if you require further information regarding Mr. Asadi.

Yours faithfully

Mahmoud-Reza Hemami

Professor of Conservation Ecology
